

Set of three stools designed by Jaana Turunen,  
Sweden, 1960s.

Beech.

Simplicity and exceptional quality characterise this set of solid birch stools. Their sculptural design aesthetic is achieved through fairly wide, rounded legs. Remarkably, the box joints of each stool's four legs extend through to the top and edges of the seat, creating a striking graphic pattern and adding stability.

H: 42 cm / 16 1/2 "

Diameter: 32.5 cm / 12 3/4 "
